

Release Plan

Rate My Professor

<https://github.com/IvanKuria/About-My-Professor?tab=readme-ov-file>

Features

Mandatory:

- full name
- picture(placeholder if unavailable)
- email/phone number
- Office Hours
- Department

Optional:

- Division
 - more general and sometimes the same as Department
- Research if available
 - interests/area of expertise
- Publications if available
- Personal website
- Other info if available(courses they teach, etc..)
- rate my prof link
 - from previous school jobs
 - at UCSC
 - include rating
 - (could possibly include a top review)
 - Could include top tags
- classes taught/will teach
- also have a button for the pop-up on the shopping cart page

API

<https://campusdirectory.ucsc.edu/api/uid/cam>

- get the uID from name
- get rest of info with uID from API

Sanity Check

- **Timeline:**

- Sprints 1, 2 and 4 seem well balanced, however Sprint 3 is much more involved. As a result, we moved some user stories from Sprint 3 to Sprint 2 in an effort to have a less heavy Sprint 3 and moved user stories from Sprint 4 to Sprint 3 to have a less heavy Sprint 4.
- **Dependencies:**
 - RateMyProfessors api, Campus Catalog api and scrapping jobs. We have to ensure that we don't get affected by rate limiting/unavailability of the apis. Could potentially look at adding retry logic.

User Stories by Priority

As a {user role}, I want {goal} [so that {reason}]

- As a student I want an application that is easy to open, close, or move so that the search page doesn't become too dense **(3 points)**
- As a student I want to know the full name of a professor so that I can recognize professors that are mainly known by their first names. **(4 points)**
- As a student I want to know the email/phone number of a professor so that I can have a way to contact them regarding information about the class. **(2 points)**
- As a student I want to see a picture of the professor so I can recognize them in person. **(3 points)**
- As a student I want to know the OH of a professor so I can figure out my entire schedule. **(3 points)**
- As a student I want easy access to the Rate My Professor rating of the professor so I know if other students generally enjoyed their class. **(8 points)**
- As a student I want to know what department a professor is in so that I know their specialty. **(1 point)**
- As a student interested in research I want to see if a professor has research interests so that I can connect with them. **(3 points)**
- As a student I want a link to the professor's publications so that I can see more information about them and their courses that they consider important. **(3 points)**
- As a new student I want to know the division/other classes taught by a professor so that I can recognize the division name when people talk about it. **(2 points)**
- As a student I want to have this information also available in the shopping cart page so that I can better plan my quarter. **(3 points)**
- As a student I want to know the professor's Rate My Professor tags so that I know what to expect from them. **(4 points)**
- As a student I want a link to the professors website so that I can learn more about them **(3 points)**
- As a student I want to know what other classes a professor teaches so that I can explore them if I am interested in the class or like their teaching style. **(13 points)**

Prospective Sprint Plan by user story

Sprint 1

- As a student I want an application that is easy to open, close, or move so that the search page doesn't become too dense **(2 points)**
- As a student I want to know the full name of a professor so that I can recognize professors that are mainly known by their first names. **(4 points)**
- Spike: Research React, JavaScript, and chrome extension development **(2 points)**

Sprint 2

- As a student I want to know the email/phone number of a professor so that I can have a way to contact them regarding information about the class. **(2 points)**
- As a student I want to see a picture of the professor so I can recognize them in person. **(3 points)**
- As a student I want to know the OH of a professor so I can figure out my entire schedule. **(3 points)**
- As a student I want to know what department a professor is in so that I know their specialty. **(1 point)**
- As a new student I want to know the division/other classes taught by a professor so that I can recognize the division name when people talk about it. **(2 points)**
- As a student interested in research I want to see if a professor has research interests so that I can connect with them. **(3 points)**

Sprint 3

- As a student I want easy access to the Rate My Professor rating of the professor so I know if other students generally enjoyed their class. **(6 points)**
- As a student I want a link to the professor's publications so that I can see more information about them and their courses that they consider important. **(3 points)**
- As a student I want to have this information also available in the shopping cart page so that I can better plan my quarter. **(4 points)**
- As a student I want to know the professor's Rate My Professor tags so that I know what to expect from them. **(4 points)**
- As a student I want a link to the professors website so that I can learn more about them **(3 points)** - (another scraping job)
- As a browser I want websites and extensions I use to load quickly so I don't have to wait for information especially if I just visited the page **(5 points)**

Sprint 4

- As a student I want to know what other classes a professor has taught or will teach so that I can explore them if I am interested in the class or like their teaching style. **(8 points)**
- As an extension user I want the information I see to be clearly structured and the information displayed dynamically but consistently so that I can easily find/see the information I want **(8 points)**

- As a student, I want to be able to easily access the extension as well as future updates
(5 points)
- **Spike: Testing (7 points)**
 - End to End React Testing
 - Manual Testing - see test plan

Backlog

- IIm integration
- Code Cleaning
- add extension functionality to the class schedule page
