

Test Plan and Report

Product Name: About My Professor

Team: Bhagavan, Edwin, Ivan, Lakshana

Date: 11/18/25

Sprint 1:

1. As a student I want an application that is easy to open, close, or move so that the search page doesn't become too dense
 - a. Scenario 1: In Class Search Page or Shopping Cart (**Pass/Fail**)
 - i. Look at a professor and check to see if they have a info button to the far right of the course panel
2. As a student I want to know the full name of a professor so that I can recognize professors that are mainly known by their first names. (Bhagavan)
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. navigate to enrollment page
 - ii. see if professor has an info icon (if not we don't have the uID)
 - iii. click on icon
 - iv. check to see if name matches by checking the ucsc directory

Sprint 2:

1. As a student I want to know what department a professor is in so that I know their specialty. (Edwin)
 - a. Scenario 1: In Class Search/Shopping Cart page (**Pass/Fail**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered for the department
 - ii. Click on the info button
 - iii. Check to see if any department array exist for the professor
 1. If so, then should be displayed
 2. If not there shouldn't be any fields for them
2. As a student I want to know the email/phone number of a professor so that I can have a way to contact them regarding information about the class (Bhagavan)
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid or missing and no component will be rendered
 - ii. Click on the info button
 - iii. Check to see if the email/phone exists for the professor in the staff directory

1. If so, then should be displayed
 2. If not there shouldn't be any fields for them
3. As a student I want to see a picture of the professor so I can recognize them in person(Ivan)
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered
 - ii. Click on the info button
 - iii. Check to see if the picture exists for the professor
 1. If so, then display the picture
 2. If not, display a generic blank picture
4. As a student I want to know the OH of a professor so I can figure out my entire schedule
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered
 - ii. Click on the info button
 - iii. Check to see if the OH info exists for the professor
 1. If so, then display the OH info.
 2. If not, don't display it
5. As a new student I want to know the division/other classes taught by a professor so that I can recognize the division name when people talk about it
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered
 - ii. Click on the info button
 - iii. Check to see if the division/other classes info exists for the professor
 1. If so, then display the division/other classes info.
 2. If not, don't display it
6. As a student interested in research I want to see if a professor has research interests so that I can connect with them (Bhagavan)
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered
 - ii. Click on the info button
 - iii. Check to see if research info exists in the ucsc staff directory for the professor
 1. If so, then should be displayed
 2. If not, there shouldn't be a field for it unless scraped and in prof_research_topics.json

Sprint 3:

1. User Story: As a student I want a link to the professor's publications so that I can see more information about them and their courses that they consider important

- a. Scenario 1: In Class Search page or In Shopping Cart **(Pass)**
 - i. See if professor has publications(if not, content isn't rendered)
 - ii. Click on each publication and ensure the link works
2. User Story: As a student I want a link to the professors website so that I can learn more about them
 - a. Scenario 1: In Class Search page or In Shopping Cart **(Pass)**
 - i. See if professor has website link(if not, content isn't rendered)
 - ii. Click on the link to ensure it works and belongs to the professor
3. User Story: As a student I want easy access to the Rate My Professor(RMP) rating of the professor so I know if other students generally enjoyed their class.(Ivan)
 - a. Scenario 1: In Class Search page or In Shopping Cart **(Pass)**
 - i. See if a professor has an rmp profile(if they don't have a profile don't render any content)
 - ii. See if a professor has ratings
 - iii. See if a professor has a RMP link. Click on the link and verify it belongs to that professor
4. User Story: As a student I want to know the professor's Rate My Professor tags so that I know what to expect from them. (Ivan)
 - a. Scenario 1: In Class Search page or In Shopping Cart **(Pass)**
 - i. See if a professor has a rmp profile(if they don't have a profile, don't render any content)
 - ii. See if a professor has tags
5. User Story: As a student I want to have this information also available in the shopping cart page so that I can better plan my quarter. (Bhagavan)
 - a. Scenario 1: In Shopping Cart **(Pass)**
 - i. See if the professor has an info button next to the course panel
 1. If not, then check if uID is invalid or missing
6. User Story: As a browser I want websites and extensions I use to load quickly so I don't have to wait for information
 - a. Scenario 1: In Class Search page or In Shopping Cart **(Pass)**
 - i. See if the data within the card is saved to localStorage
 - ii. Open the developer console
 - iii. Check the applications section
 - iv. Navigate to About My Professor
 - v. Check the data is stored in json format
7. User Story: As a student I want a link to the professors website so that I can learn more about them (Lakshana)
 - a. Scenario1 **(Pass)**
 - i. Open MyUCSC and go to the course enrollment page
 - ii. Click on the info button on the top right corner of the professor that the user wants the website of
 - iii. user navigates to my ucsc page with extension, clicks on info button to open professor info panel

- iv. if prof has a link, there will a section called website, clicking link will take u to personal website in new tab
- v. If there is no section titled “website”, the professor has no website linked on the campus directory
- vi. if prof has a link, there will a section called publications, clicking link will take u to personal website in new tab
- vii. If there is no section titled “publications”, the professor has no publications linked on the campus directory

Sprint 4:

1. User Story: As an extension user I want the information I see to be clearly structured and the information displayed dynamically but consistently so that I can easily find/see the information I want
 - a. Placeholder
 - b. Placeholder
 - c. Placeholder
 - d. Placeholder
 - e. Scenario 5: in class search page or in shopping cart (**pass**)
 - i. Open the modal for a professor that has a website and publication(s) and look at the main card area
 - ii. Click on the more info button to see if the section expands. Website link and publications should appear. Button text changes to “show less”
 - f. Scenario 6: in class search page or in shopping cart (**pass**)
 - i. Open the modal for any professor and click on the More Info button
 - ii. For any API return, the modal should display either the API response (e.g. “Machine Learning”) or null (“Not listed in public directory”)
 - g. Scenario 7: in class search page or in shopping cart (**pass**)
 - i. Open the modal for any professor
 - ii. Click on the more info button
 1. If the professor has no RMP profile, the whole RMP component isn’t rendered. Only the campus component is rendered.
 2. If they do but have no ratings, then it will show “N/A” or similar for each category
2. User Story: As a student I want to know what other classes a professor teaches so that I can explore them if I am interested in the class or like their teaching style. (Bhagavan)
 - a. Scenario 1: In Class Search page or In Shopping Cart (**Pass**)
 - i. See if the professor has an info button next to the course panel
 1. If not, then the uID is invalid and no component will be rendered
 - ii. click on info button
 - iii. if something listed for courses taught

1. If a professor is scheduled to teach a class this year or in the past 4 years according to this [website](#) ([and this one](#)) then those classes should be added to the list of other courses they teach verify with prof_classes.json
 2. If nothing in prof_classes.json verify the classes are the same as what is displayed in the ucsc staff directory
 - iv. if nothing listed for courses taught
 1. verify nothing for the professor in prof_classes.json or ucsc staff directory
3. User Story: As a student, I want to be able to easily access the extension as well as future updates
 - a. Scenario 1: Via the chrome web store on Windows (**Pass**)
 - i. Verify that a working version of the extension is downloadable via the chrome webstore
 - ii. Ensure that the extension loads properly for chrome users
 - b. Scenario 1: Via the chrome web store on Mac (**Pass**)
 - i. Verify that a working version of the extension is downloadable via the chrome webstore
 - ii. Ensure that the extension loads properly for chrome users
4. User Story: As an extension user, I want the app to be tested thoroughly so that I have a good user experience and for the app to not be buggy (Edwin)
 - a. Scenario 1: In Class Search or Shopping Cart (**Pass**)
 - i. See if all functions behave as expected
 1. If not, then the unit/e2e test will fail and the console will report which part of it failed.
 - ii. See if the info button opens with the appropriate information
 1. If not and one or both components are missing, then the e2e test will fail and the console will report the error.
